

(2) Encouraging the development of comprehensive disaster preparedness and assistance plans, programs, capabilities, and organizations by the State and its political subdivisions.

(3) Assisting in achieving greater coordination of disaster preparation and response programs.

(4) Providing technical advice and guidance to States and their political subdivisions for organizing and preparing to meet the effects of disasters.

(b) These regulations are not to be interpreted as authorizing States and their political subdivisions to request or receive additional assistance relating to particular disaster incidents.

§312.4 General.

(a) The Administrator, FEMA, will provide statements to States and their political subdivisions concerning Agency mission and goals, Annual Program Emphasis, and other directions, instructions, and technical guidance which together specify preparedness and response activities for both attack-related and natural disasters.

(b) States and their political subdivisions may apply to FEMA for financial assistance under the Act in a manner prescribed by Federal Regulations governing grants and cooperative agreements. Such applications must be compatible with FEMA's goals and requirements described in paragraph (a) of this section.

(c) Financial contributions to States and their political subdivisions are made by FEMA based on approval of the activities and projects described in the Annual Program Paper, and/or Comprehensive Cooperative Agreement, and which are in conformance with provisions of CPG 1-3, and applicable FEMA regulations set forth in chapter 1 of this title 44, chapter 1, subchapter E, of the Code of Federal Regulations. Financial contributions will not be made unless substantive activities and projects in preparation for and response to attack-related disasters are identified, and progress is indicated in the submissions, and recorded in program reporting systems. The presence of unavoidable circumstances, and the good faith effort of the applicant, will be considered if certain objectives are not met.

(d) State and local officials may use personnel, equipment, and facilities for natural disasters outside the physical boundaries of the jurisdiction and under the conditions stated within this regulation.

(e) Specific criteria relating to the preparedness and response activities are given in §§312.5 and 312.6 of this part.

§312.5 Personnel.

FEMA contributes to the development and support of emergency management organizations in the States and their political subdivisions, and to the development, operation, and maintenance of specific programs, through payment of salaries and benefits of State and local civil defense staff, and the payment of administrative expenses and travel, not to exceed 50 percent. FEMA also provides contributions for training and education expenses. The following use of such personnel for natural disaster purposes is allowable provided that such usage is consistent with, contributes to, and does not detract from attack-related civil defense preparedness:

(a) In developing, maintaining, testing and exercising plans, systems, and procedures for the protection of people and property from the effects of attack-related disasters, States and their political subdivisions may include and provide for natural disasters.

(b) Personnel supported in part through contributions under the Act may be assigned responsibilities for preparation for and response to natural disasters in any specific emergency occurring in a State or its political subdivisions as determined by the responsible State or local officials, respectively.

(c) Personnel supported in whole under the Act, may be assigned to emergency response operations for 15 days at the discretion of State officials; approval of the FEMA Regional Administrator is required for the use of these personnel in excess of 15 days. An assignment to emergency response operations does not preclude the accomplishment of program work and objectives. Failure to accomplish such work may subject the State to the withholding of funds contributed under the

§ 312.6

Act, or to collection of funds already obligated, not to exceed the estimated cost of the work not performed, as determined by the Regional Administrator.

(d) In the event of an emergency or major disaster declared under the Disaster Relief Act of 1974, as amended, personnel will not be provided overtime compensation and expenses under the Act.

§ 312.6 Materials and facilities.

FEMA also contributes to the development and support of emergency management in the States and their political subdivisions, and to the development, operation, and maintenance of specific programs, through providing certain materials and facilities. The following may be used for natural disaster purposes provided that such usage is consistent with, contributes to, and does not detract from attack-related civil defense preparedness:

(a) Materials provided and maintained through contributions under the Act.

(b) Technical information, guidance through which technical assistance is provided, and training courses, may contain examples, illustrations, discussion, suggested applications and uses of material.

(c) Equipment loaned under provisions of the Contributions Project Loan Program.

(d) Facilities, such as Emergency Operating Centers, provided and maintained through contributions under the Act.

(e) Equipment loaned or granted to the States for civil defense purposes (e.g., radiological instruments, shelter supplies).

AUTHORITY: National Security Act of 1947, as amended 50 U.S.C. 404; Defense Production Act of 1950, as amended; 50 U.S.C. app. 2061 *et seq.*; Reorganization Plan No. 3 of 1978, 3 CFR, 1978 Comp., p. 329; E.O. 12148 (44 FR 43239).

SOURCE: 45 FR 44576, July 1, 1980, unless otherwise noted.

§ 321.1 General.

A sustained state of mobilization production readiness is necessary to place the United States in a defense posture which will enable the nation to defend itself against aggression in peripheral conflicts or general war involving nuclear attacks on this country. Therefore, the facilities, machine tools, production equipment, and skilled workers necessary to produce the wartime requirements of the Department of Defense, Department of Energy, and the Maritime Administration shall be maintained in a state of readiness which will facilitate their immediate use or conversion in time of emergency, with especial emphasis on measures to maximize the probability of continued post-attack production of those items judged to be vital to survival and victory.

§ 321.2 Selection of the mobilization base.

(a) The Department of Defense shall select, for its mobilization base, facilities which produce or are capable of producing critically important military items or components (military class A components used entirely in the production, maintenance, or repair of military items) which meet one of the following:

(1) Those items which would be so urgent to the defense of this country that utmost effort must be exerted to produce them even in case of general war involving severe damage to the facilities necessary to produce these items and the components thereof.

(2) Those items essential to survival and retaliation, maintenance of health, or combat efficiency required to support peripheral war and which meet one or more of the following criteria:
